Acknowledgement

We would like to express our sincere gratitude to the faculty of Ho Chi Minh City University of Transport (UTH), and especially to our supervisor, Nguyen Van Chien, for their dedicated guidance and support throughout the development of this Capstone Project.

We would also like to thank every member of our team for their effort and close collaboration, which made it possible to complete the "Horse Racing Tournament Management System" project on schedule.

I. Project Introduction

1.1. Overview

1.1.1 Project Information

- **Project name:** Horse Racing Tournament Management System
- **Project code:**
- **Group name:** Group 3
- **Software Type:** Web application

1.1.2 Project Team

Full Name	Role	Email	Mobile
Nguyen Van Chien	Supervisor	chiennv@ut.edu.vn	
Ha Duy Hung	Leader	haduydung0912@gmail.com	
Dinh Thuy Anh	Member	anhdt1497@ut.edu.vn	
Ho Nguyen Thai Chau	Member	chauhnt3685@ut.edu.vn	
Le Thi My Hue	Member	lemyhue1803@gmail.com	
Nguyen Gia Huy	Member	nhuy22174@gmail.com	
Doan Thi Thu May	Member	maydtt6742@ut.edu.vn	
Bui Le Quang Huy	Member	huyblq0064@ut.edu.vn	

1.2. Product Background

In the context of Vietnam's growing interest in sports entertainment and digital transformation, horse racing organizations are increasingly facing the need to manage tournaments, participants, horses, jockeys, and race registration processes more efficiently. However, many racing-related activities may still depend on manual management methods such as paper forms, scattered Excel files, direct communication, or disconnected systems. This can lead to difficulties in managing tournament information, horse and jockey profiles, owner registrations, approval status, and communication between horse owners, jockeys, referees, and administrators.

Recognizing these limitations, a student team has proposed the development of a Horse Racing Management System. This system aims to digitize the main workflow of

horse racing event management, from tournament creation and participant registration to approval, race organization, and result tracking. The target users include horse owners who register horses for tournaments, jockeys who participate in races, administrators who manage tournaments and registration requests, referees who monitor race results, and viewers or related users who need to follow tournament information in a transparent and convenient way.

1.3. Existing Systems

1.3.1 Prism Horse

Link: <https://prism.horse>

Description: A horse racing management platform supporting race events, horse information, and participant management.

Actors:

- Horse Owners
- Jockeys
- Administrators
- Referees

Features:

- Horse and jockey management.
- Tournament organization.
- Race registration.
- Participant management.

Pros:

- Designed specifically for horse racing activities.
- Supports race and participant management.

Cons:

- Limited owner–jockey collaboration workflow.
- No invitation management mechanism.
- Limited registration status tracking.
- Lack of integrated communication features.

1.3.2 RaceDB

Link: <https://www.racedb.com>

Description: A race event management system that supports competition registration, participant management, race scheduling, and result tracking. The platform is primarily designed for cycling and sporting competitions.

Actors:

- Participants
- Event Organizers
- Administrators
- Race Officials

Features:

- Online participant registration.
- Race scheduling and event management.
- Result recording and ranking.
- Participant and competition tracking.

Pros:

- Supports online registration and race management.
- Provides race scheduling and result tracking.
- Offers a centralized system for competition administration.

Cons:

- Not specifically designed for horse racing.
- Does not support horse owner, horse, and jockey relationships.
- Lacks invitation and approval workflows between horse owners and jockeys.
- Does not provide horse profile management and ownership information.
- Limited support for horse racing officials and tournament-specific workflows.

1.4. Market Analysis

1.5. Business Opportunity

1.6. Software Product Vision

1.7. Project Scope & Limitations

1.7.1 Major Features

Major Features for Admin

FE-01: Login/Logout

FE-02: Manage user accounts

Major Features for Horse Owner

FE-01: Register horse for tournament

FE-02: View registration status

1.7.2 Limitations & Exclusions

LI-1: Write limitation here.

II. Software Project Management Plan

This chapter describes project planning, scheduling, risk management, communication and configuration management.

III. Software Requirement Specification

3.1. Functional Requirements

IV. Software Design Description

This chapter presents the software architecture, database design and detailed design.
