# Acknowledgement

We would like to express our sincere gratitude to the faculty of Ho Chi Minh City University of Transport (UTH), and especially to our supervisor, Nguyen Van Chien, for their dedicated guidance and support throughout the development of this Capstone Project.

We would also like to thank every member of our team for their effort and close collaboration, which made it possible to complete the "Horse Racing Tournament Management System" project on schedule.

| Doan Thi Thu May    | Member     | maydtt6742@ut.edu.vn    |        |
| Bui Le Quang Huy    | Member     | huyblq0064@ut.edu.vn    |        |

Table 1.1: Project Team

## 1.2. Product Background

In the context of Vietnam’s growing interest in sports entertainment and digital transformation, horse racing organizations are increasingly facing the need to manage tournaments, participants, horses, jockeys, and race registration processes more efficiently. However, many racing-related activities may still depend on manual management methods such as paper forms, scattered Excel files, direct communication, or disconnected systems. This can lead to difficulties in managing tournament information, horse and jockey profiles, owner registrations, approval status, and communication between horse owners, jockeys, referees, and administrators.

Recognizing these limitations, a student team has proposed the development of a Horse Racing Management System. This system aims to digitize the main workflow of horse racing event management, from tournament creation and participant registration to approval, race organization, and result tracking. The target users include horse owners who register horses for tournaments, jockeys who participate in races, administrators who manage tournaments and registration requests, referees who monitor race results, and viewers or related users who need to follow tournament information in a transparent and convenient way.

## 1.3. Existing Systems

### 1.3.1 Prism Horse

**Link:** <https://prism.horse>

**Description:** A horse racing management platform supporting race events, horse information, and participant management.

**Actors:**

- Horse Owners
- Jockeys
- Administrators
- Referees

**Features:**

- Horse and jockey management.
- Tournament organization.
- Race registration.
- Participant management.

**Pros:**

- Designed specifically for horse racing activities.
- Supports race and participant management.

**Cons:**

- Limited owner–jockey collaboration workflow.
- No invitation management mechanism.
- Limited registration status tracking.
- Lack of integrated communication features.

### 1.3.2 RaceDB

**Link:** <https://www.racedb.com>

**Description:** A race event management system that supports competition registration, participant management, race scheduling, and result tracking. The platform is primarily designed for cycling and sporting competitions.

**Actors:**

- Participants
- Event Organizers
- Administrators
- Race Officials

**Features:**

- Online participant registration.
- Race scheduling and event management.
- Result recording and ranking.
- Participant and competition tracking.

**Pros:**

- Supports online registration and race management.
- Provides race scheduling and result tracking.
- Offers a centralized system for competition administration.

**Cons:**

- Not specifically designed for horse racing.
- Does not support horse owner, horse, and jockey relationships.
- Lacks invitation and approval workflows between horse owners and jockeys.
- Does not provide horse profile management and ownership information.
- Limited support for horse racing officials and tournament-specific workflows.

## 1.4. Business Opportunity

The horse racing industry is gradually embracing digital transformation as racing organizations and clubs seek more efficient ways to manage tournaments, participants, and race operations. However, many horse racing activities still rely on manual registration processes, paper documents, and fragmented communication between horse owners, jockeys, and organizers. This creates an opportunity to develop a specialized management system that can streamline tournament registration, improve participant coordination, and enhance transparency throughout the racing process.

The proposed Horse Racing Management System aims to optimize race organization by supporting online tournament registration, horse and jockey management, invitation workflows, and registration approval processes. The system can reduce administrative workload, minimize registration errors, and improve communication among stakeholders.

The system will compete in the sports event management and competition management software market while specifically targeting the horse racing domain, where existing solutions often lack comprehensive support for horse owner-jockey collaboration, race registration workflows, and tournament management requirements. By focusing on the unique characteristics of horse racing activities, the system has the potential to provide a more specialized and efficient solution for racing organizations and participants.

## 1.5. Software Product Vision

For horse racing organizations seeking to digitalize tournament operations, the Horse Racing Management System is a web-based platform that enables horse owners to register horses, invite jockeys, and participate in racing tournaments through an integrated online process. Jockeys can manage invitations and confirm participation, while administrators and referees can efficiently monitor registrations, approve requests, and oversee race activities.

Unlike traditional management methods that rely on paper documents, manual registration, and fragmented communication, the Horse Racing Management System reduces administrative workload, improves the accuracy and transparency of tournament management, and enhances collaboration among horse owners, jockeys, referees, and administrators. By digitalizing registration workflows, participant information, and competition management, the system also establishes a foundation for future services such as performance analytics, race statistics, online event management, and data-driven decision making in horse racing organizations.

## 1.6. Project Scope & Limitations

### 1.6.1 Major Features

#### Major Features for Admin

FE-01: Login/Logout

FE-02: Manage user accounts

## **Major Features for Horse Owner**

FE-01: Register horse for tournament

FE-02: View registration status

### **1.6.2 Limitations & Exclusions**

LI-1: Write limitation here.

## II. Software Project Management Plan

This chapter describes project planning, scheduling, risk management, communication and configuration management.

## III. Software Requirement Specification

### 3.1. Functional Requirements

#### 3.1.1 Horse Owner Registration Screen Flow

Figure 3.1: Horse Owner registration screen flow

### 3.1.2 Screen description

| # | Feature      | Screen            | Description                                                                                       |
|---|--------------|-------------------|---------------------------------------------------------------------------------------------------|
| 1 | General      | Home              | Landing page for owners; overview and navigation to login/register.                               |
| 2 | General      | Login             | Authentication screen allowing the owner to access the system with secure credentials.            |
| 3 | Dashboard    | Owner Dash-board  | The central hub displaying the owner's horses, upcoming races, and quick actions.                 |
| 4 | Registration | Registration Form | Form to register as a horse owner: personal details, farm details, contact and horse information. |
| 5 | Registration | Confirmation      | Review and confirm entered data before submission.                                                |
| 6 | Registration | Success           | Acknowledgement that registration was received and next steps.                                    |

Table 3.1: Horse Owner screen descriptions

## 3.2. Web Application

### 3.2.1 Horse Owner

#### Login

**Role:** Horse Owner

- **Function trigger:** The owner enters account credentials to log in.
- **Function description:**
  - **Purpose:**
    1. Verify the owner's identity.
    2. Grant access to owner functionalities.
  - **Data processing:**
    1. The owner enters username and password.
    2. The system validates credentials.
    3. The system identifies the OWNER role.
    4. The system creates a login session.
- **Function details:**
  - Successful login redirects to Owner Dashboard.
  - Invalid credentials display an error message.

- Users without accounts may register.

Screen layout:

Figure 3.2: Horse Owner Login

### 3.2.2 Manage Horses

**Role:** Horse Owner

- **Function trigger:** Select “Quan ly Ngua”.
- **Function description:**
  - **Purpose:**
    1. Register new horses.
    2. Manage owned horses.
  - **Data processing:**
    1. Enter horse name.
    2. Enter age.
    3. Select breed.
    4. Select gender.
    5. Save horse information.
- **Function details:**
  - Add new horses.
  - Edit horse information.
  - Delete horse information.
  - Display horse list.

Screen layout:

Figure 3.3: Manage Horses

### 3.2.3 Invite Jockey

Role: Horse Owner

- **Function trigger:** Select “Moi Jockey”.
- **Function description:**
  - **Purpose:**
    1. Invite jockeys.
    2. Create horse-jockey partnerships.
  - **Data processing:**
    1. Select jockey.
    2. Select horse.
    3. Select tournament.
    4. Enter invitation message.
    5. Send invitation.
- **Function details:**
  - Invitation status is displayed.
  - Pending invitations can be monitored.
  - Accepted invitations may be used for registration.

Screen layout:

Figure 3.4: Invite Jockey

### 3.2.4 Register Tournament

**Role:** Horse Owner

- **Function trigger:** Select “Dang ky Giai dau”.
- **Function description:**
  - **Purpose:**
    1. Register horse-jockey pairs.
    2. Participate in tournaments.
  - **Data processing:**
    1. Retrieve available tournaments.
    2. Check accepted jockey invitations.
    3. Select horse-jockey pair.
    4. Submit registration request.
- **Function details:**
  - Only accepted invitations may register.
  - Registration requests are sent to administrators.
  - Invalid pairs cannot participate.

**Screen layout:**

Figure 3.5: Tournament Registration

### 3.2.5 Registered Tournaments

**Role:** Horse Owner

- **Function trigger:** Select “Giai dau da dang ky”.
- **Function description:**
  - **Purpose:**
    1. Monitor registration status.
    2. View approval results.
  - **Data processing:**
    1. Retrieve registration records.
    2. Retrieve approval status.
    3. Display registration history.
- **Function details:**
  - Display horse information.
  - Display jockey information.
  - Display approval status.

**Screen layout:**

Figure 3.6: Registered Tournaments

### 3.2.6 Horse Schedule

Role: Horse Owner

- **Function trigger:** Select “Lịch thi đấu của Ngựa”.
- **Function description:**
  - **Purpose:**
    1. View upcoming races.
    2. Prepare for competitions.
  - **Data processing:**
    1. Retrieve race schedules.
    2. Retrieve tournament information.
    3. Display race information.
- **Function details:**
  - Display race date.
  - Display location.
  - Display tournament information.

Screen layout:

Figure 3.7: Horse Schedule

### 3.2.7 Race Results

Role: Horse Owner

- **Function trigger:** Select “Ket qua thi dau”.
- **Function description:**
  - **Purpose:**
    1. Review race results.
    2. Evaluate horse performance.
  - **Data processing:**
    1. Retrieve completed races.
    2. Retrieve rankings.
    3. Retrieve scores.
    4. Retrieve violations.
- **Function details:**
  - Display race rankings.
  - Display accumulated points.
  - Display remarks.
  - Display violations.

Screen layout:

Figure 3.8: Race Results

### 3.2.8 Owner Profile

Role: Horse Owner

- **Function trigger:** Select “Ho so ca nhan”.
- **Function description:**
  - **Purpose:**
    1. Manage personal information.
    2. Update profile information.
  - **Data processing:**
    1. Update personal information.
    2. Update contact information.
    3. Update company information.
    4. Save profile data.
- **Function details:**
  - Edit owner profile.
  - Edit biography.
  - Update social information.

### 3.2.9 Ranking

**Role:** Horse Owner

- **Function trigger:** Select “Bang xep hang”.
- **Function description:**
  - **Purpose:**
    1. View official rankings.
    2. Compare competition performance.
  - **Data processing:**

1. Retrieve horse rankings.
2. Retrieve jockey rankings.
3. Filter tournaments.

- **Function details:**

- Display ranking positions.
- Display accumulated scores.
- Display tournament filters.

**Screen layout:**

Figure 3.10: Ranking

### 3.2.10 Spectator

#### Login

#### Role: Spectator

- **Function trigger:** The spectator enters account credentials to log in.
- **Function description:**
  - **Purpose:**
    1. Verify the spectator's identity.
    2. Grant access to spectator functionalities.
  - **Data processing:**
    1. The spectator enters username and password.
    2. The system validates credentials.
    3. The system identifies the SPECTATOR role.

4. The system creates a login session.

Screen layout:

Figure 3.11: Horse Spectator Login

## Prediction

Role: Spectator

- **Function trigger:** The spectator navigates to the "Du doan Tran dua" (Predict Race) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to submit a new race ranking prediction to earn reward points.
    2. Allow the spectator to view, edit, or delete their existing prediction history.
  - **Data processing:**
    1. **For creating a new prediction:**
      - \* The spectator selects a race, selects a horse, and chooses the predicted finishing rank from the dropdown menus.
      - \* The spectator clicks the "Gui du doan" button.
      - \* The system validates the prediction data and saves it to the database.
    2. **For managing prediction history:**
      - \* The system retrieves and displays the spectator's accumulated reward points and prediction history list (including Race, Horse, Predicted Rank, Result, and Actions).
      - \* If the race status is pending ("Cho ket qua"), the system allows the spectator to click "Sua" (Edit) or "Xoa" (Delete) to update their prediction.
      - \* If the race has ended, the actions are disabled ("Da khoa"), and the system updates the prediction status ("DUNG" / "SAI") along with the spectator's total reward points.

Screen layout:

Figure 3.12: Horse Spectator Prediction

## Schedule and Results

**Role:** Spectator

- **Function trigger:** The spectator navigates to the "Lịch & Ket qua" (Schedule & Results) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to view the list of upcoming race schedules.
    2. Allow the spectator to view the detailed results and rankings of completed races.
  - **Data processing:**
    1. **For upcoming race schedules ("Lịch thi đấu sắp diễn ra"):**
      - \* The system retrieves and displays scheduled races with status "SCHEDULED".
      - \* Information includes: Race name (e.g., Heat 1), referee name, date, time, distance, track condition, and the list of participating horses ("Danh sách tham gia") with their respective jockeys.
    2. **For completed race results ("Ket qua các trận đã kết thúc"):**
      - \* The system retrieves and displays finished races with status "HOÀN THÀNH".
      - \* For each completed race (e.g., Grand Final), the spectator can expand to view the detailed ranking table including: Rank ("Hạng"), Horse ("Ngựa đua"), Jockey, Score ("Điểm"), and Notes ("Ghi chú").

## Personal Profile

### Role: Spectator

- **Function trigger:** The spectator navigates to the "Ho so ca nhan" (Personal Profile) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to view and update their personal profile information.
    2. Display the spectator's prediction statistics, performance overview, and recent prediction history.
  - **Data processing:**
    1. **For updating profile information:**
      - \* The spectator can view and edit the following fields: Full Name ("Ho va Ten"), Email, Phone Number ("So dien thoai"), Avatar URL ("URL Anh dai dien"), Favorite Horse Breed ("Giong ngua yeu thich"), and Favorite Jockey ("Nai ngua yeu thich").
      - \* The spectator clicks the "Cap nhat thong tin" button.
      - \* The system validates the entered data and updates the profile details in the database.
    2. **For viewing statistics and history:**
      - \* The system retrieves and displays statistical insights ("Thong ke & Thanh tich") including: Current Rank ("Thu hang hien tai"), Total Predictions ("Tong so tran du doan"), Accuracy Rate ("Ty le chinh xac"), and Reward Points ("Diem thuong").
      - \* The system retrieves and lists the recent prediction history ("Lich su du doan gan day") with columns: Race Name ("Ten tran dua"), Selected Horse ("Ngua da chon"), Time ("Thoi gian"), Status ("Trang thai"), and Reward Points ("Diem thuong").

Screen layout:

Figure 3.14: Horse Spectator Personal Profile

## Leaderboard

Role: Spectator

- **Function trigger:** The spectator navigates to the "Bang Xep Hang" (Leaderboard) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to view the official competition rankings of horses and jockeys, filtered by tournament.
    2. Allow the spectator to view the top 10 spectators with the highest prediction accuracy scores.
  - **Data processing:**
    1. **For Horse & Jockey Leaderboard ("Ngua & Jockey" tab):**
      - \* The spectator can filter rankings by tournament ("Loc theo giai dau") including options: All ("Tat ca"), Summer Championship 2026, or Spring Derby 2026.
      - \* The system retrieves and displays the Horse Ranking table ("Xep hang Ngua dua") including columns: Rank ("Hang"), Horse Name ("Ten ngua"), and Accumulated Points ("Diem tích lũy").
      - \* The system retrieves and displays the Jockey Ranking table ("Xep hang Jockey") including columns: Rank ("Hang"), Jockey Name ("Ten jockey"), and Accumulated Points ("Diem tích lũy").
    2. **For Top Spectators Leaderboard ("Khan gia xuất sắc" tab):**
      - \* The system retrieves and displays the top 10 spectators with the highest prediction scores ("Top 10 Khan gia co diem du doan cao nhất").
      - \* The leaderboard table includes columns: Rank ("Hang"), Spectator Name ("Khan gia"), Favorite Horse Breed ("Giống ngựa yêu thích"), and Accumulated Points ("Diem tích lũy").

## 3.3. Non-Functional Requirements

### 3.3.1 External Interfaces

To ensure effective communication between users and external systems, the following interfaces shall be supported.

#### User Interface

- The system shall provide a user-friendly and intuitive interface for Horse Owners, Jockeys, Referees, and Administrators.
- The graphical interface shall follow modern web design standards and support responsive layouts.
- Users shall be able to access the system through desktop computers, tablets, and mobile devices.
- Navigation menus and functions shall remain consistent throughout the system.

### **Authentication Interface**

- The system shall support secure authentication using username and password.
- Role-based access control shall restrict system functions according to user roles.
- User sessions shall be managed securely to prevent unauthorized access.

### **Database Interface**

- The application shall communicate with the database system to store and retrieve information.
- Data synchronization between the application server and database server shall be maintained.
- The database shall support CRUD operations for horses, tournaments, registrations, invitations, and users.

### **3.3.2 Quality Attributes**

#### **Usability**

#### **User-Friendly Interface**

- The system shall provide a simple and intuitive interface.
- Functions such as tournament registration and jockey invitation shall require minimal user actions.
- The interface shall be easy to understand for both novice and experienced users.

#### **Training and Familiarization Time**

- Horse Owners and Jockeys shall require less than 30 minutes to learn the basic functions.
- Administrators shall require approximately 1–2 hours to understand management operations.

#### **Usability Metrics**

- Tournament registration shall be completed within 3 minutes.
- Error messages shall clearly guide users to correct invalid input.
- User feedback shall be collected to improve usability.

## **Reliability**

### **Availability**

- The system shall maintain at least 99% availability.
- Maintenance shall be scheduled during low-traffic periods.

### **Data Integrity**

- Registration and tournament information shall be stored accurately.
- Duplicate registrations shall be prevented.
- Data consistency shall be maintained across all modules.

### **Error Handling**

- The system shall display meaningful error messages.
- Critical system errors shall be logged for administrators.
- The system shall recover from failures with minimal data loss.

## **Performance**

### **Response Time**

- Normal user requests shall respond within 2 seconds.
- Under heavy load conditions, response time shall not exceed 5 seconds.

### **Concurrent Users**

- The system shall support at least 500 concurrent users.
- Multiple users shall access the system simultaneously without significant performance degradation.

### **Database Performance**

- Search operations shall complete within 3 seconds.
- Registration transactions shall be processed efficiently.

## **Security**

- Passwords shall be encrypted before storage.
- Unauthorized access attempts shall be logged.
- Session timeout mechanisms shall automatically log out inactive users.
- Input validation shall prevent invalid data submission.

## Maintainability

- The system shall follow a modular architecture.
- Source code shall comply with coding standards.
- New features shall be added with minimal impact on existing modules.
- API endpoints and database structures shall be documented.

## Portability

- The system shall support Google Chrome, Microsoft Edge, and Mozilla Firefox.
- The application shall operate on both Windows and Linux servers.
- Users shall access the system without additional software installation.

## 3.4. Web Application

### 3.4.1 Horse Owner

#### Login

**Role:** Horse Owner

- **Function trigger:** The owner enters account credentials to log in.
- **Function description:**
  - **Purpose:**
    1. Verify the owner's identity.
    2. Grant access to owner functionalities.
  - **Data processing:**
    1. The owner enters username and password.
    2. The system validates credentials.
    3. The system identifies the OWNER role.
    4. The system creates a login session.
- **Function details:**
  - Successful login redirects to Owner Dashboard.
  - Invalid credentials display an error message.
  - Users without accounts may register.

Screen layout:

Figure 3.18: Horse Owner Login

### 3.4.2 Manage Horses

**Role:** Horse Owner

- **Function trigger:** Select “Quan ly Ngua”.
- **Function description:**
  - **Purpose:**
    1. Register new horses.
    2. Manage owned horses.
  - **Data processing:**
    1. Enter horse name.
    2. Enter age.
    3. Select breed.
    4. Select gender.
    5. Save horse information.
- **Function details:**
  - Add new horses.
  - Edit horse information.
  - Delete horse information.
  - Display horse list.

Screen layout:

Figure 3.19: Manage Horses

### 3.4.3 Invite Jockey

Role: Horse Owner

- **Function trigger:** Select “Moi Jockey”.
- **Function description:**
  - **Purpose:**
    1. Invite jockeys.
    2. Create horse-jockey partnerships.
  - **Data processing:**
    1. Select jockey.
    2. Select horse.
    3. Select tournament.
    4. Enter invitation message.
    5. Send invitation.
- **Function details:**
  - Invitation status is displayed.
  - Pending invitations can be monitored.
  - Accepted invitations may be used for registration.

Screen layout:

Figure 3.20: Invite Jockey

### 3.4.4 Register Tournament

**Role:** Horse Owner

- **Function trigger:** Select “Đăng ký Giải đấu”.
- **Function description:**
  - **Purpose:**
    1. Register horse-jockey pairs.
    2. Participate in tournaments.
  - **Data processing:**
    1. Retrieve available tournaments.
    2. Check accepted jockey invitations.
    3. Select horse-jockey pair.
    4. Submit registration request.
- **Function details:**
  - Only accepted invitations may register.
  - Registration requests are sent to administrators.
  - Invalid pairs cannot participate.

**Screen layout:**

Figure 3.21: Tournament Registration

### 3.4.5 Registered Tournaments

**Role:** Horse Owner

- **Function trigger:** Select “Giai dau da dang ky”.
- **Function description:**
  - **Purpose:**
    1. Monitor registration status.
    2. View approval results.
  - **Data processing:**
    1. Retrieve registration records.
    2. Retrieve approval status.
    3. Display registration history.
- **Function details:**
  - Display horse information.
  - Display jockey information.
  - Display approval status.

**Screen layout:**

Figure 3.22: Registered Tournaments

### 3.4.6 Horse Schedule

Role: Horse Owner

- **Function trigger:** Select “Lịch thi đấu của Ngựa”.
- **Function description:**
  - **Purpose:**
    1. View upcoming races.
    2. Prepare for competitions.
  - **Data processing:**
    1. Retrieve race schedules.
    2. Retrieve tournament information.
    3. Display race information.
- **Function details:**
  - Display race date.
  - Display location.
  - Display tournament information.

Screen layout:

Figure 3.23: Horse Schedule

### 3.4.7 Race Results

Role: Horse Owner

- **Function trigger:** Select “Ket qua thi dau”.
- **Function description:**
  - **Purpose:**
    1. Review race results.
    2. Evaluate horse performance.
  - **Data processing:**
    1. Retrieve completed races.
    2. Retrieve rankings.
    3. Retrieve scores.
    4. Retrieve violations.
- **Function details:**
  - Display race rankings.
  - Display accumulated points.
  - Display remarks.
  - Display violations.

Screen layout:

Figure 3.24: Race Results

### 3.4.8 Owner Profile

Role: Horse Owner

- **Function trigger:** Select “Ho so ca nhan”.
- **Function description:**
  - **Purpose:**
    1. Manage personal information.
    2. Update profile information.
  - **Data processing:**
    1. Update personal information.
    2. Update contact information.
    3. Update company information.
    4. Save profile data.
- **Function details:**
  - Edit owner profile.
  - Edit biography.
  - Update social information.

### 3.4.9 Ranking

**Role:** Horse Owner

- **Function trigger:** Select “Bang xep hang”.
- **Function description:**
  - **Purpose:**
    1. View official rankings.
    2. Compare competition performance.
  - **Data processing:**

38

1. Retrieve horse rankings.
2. Retrieve jockey rankings.
3. Filter tournaments.

- **Function details:**

- Display ranking positions.
- Display accumulated scores.
- Display tournament filters.

**Screen layout:**

### 3.4.10 Spectator

#### Login

#### Role: Spectator

- **Function trigger:** The spectator enters account credentials to log in.
- **Function description:**
  - **Purpose:**
    1. Verify the spectator's identity.
    2. Grant access to spectator functionalities.
  - **Data processing:**
    1. The spectator enters username and password.
    2. The system validates credentials.
    3. The system identifies the SPECTATOR role.

4. The system creates a login session.

Screen layout:

Figure 3.27: Horse Spectator Login

## Prediction

Role: Spectator

- **Function trigger:** The spectator navigates to the "Du doan Tran dua" (Predict Race) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to submit a new race ranking prediction to earn reward points.
    2. Allow the spectator to view, edit, or delete their existing prediction history.
  - **Data processing:**
    1. **For creating a new prediction:**
      - \* The spectator selects a race, selects a horse, and chooses the predicted finishing rank from the dropdown menus.
      - \* The spectator clicks the "Gui du doan" button.
      - \* The system validates the prediction data and saves it to the database.
    2. **For managing prediction history:**
      - \* The system retrieves and displays the spectator's accumulated reward points and prediction history list (including Race, Horse, Predicted Rank, Result, and Actions).
      - \* If the race status is pending ("Cho ket qua"), the system allows the spectator to click "Sua" (Edit) or "Xoa" (Delete) to update their prediction.
      - \* If the race has ended, the actions are disabled ("Da khoa"), and the system updates the prediction status ("DUNG" / "SAI") along with the spectator's total reward points.

Screen layout:

Figure 3.28: Horse Spectator Prediction

## Schedule and Results

**Role:** Spectator

- **Function trigger:** The spectator navigates to the "Lịch & Ket qua" (Schedule & Results) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to view the list of upcoming race schedules.
    2. Allow the spectator to view the detailed results and rankings of completed races.
  - **Data processing:**
    1. **For upcoming race schedules ("Lịch thi đấu sắp diễn ra"):**
      - \* The system retrieves and displays scheduled races with status "SCHEDULED".
      - \* Information includes: Race name (e.g., Heat 1), referee name, date, time, distance, track condition, and the list of participating horses ("Danh sách tham gia") with their respective jockeys.
    2. **For completed race results ("Ket qua các trận đã kết thúc"):**
      - \* The system retrieves and displays finished races with status "HOÀN THÀNH".
      - \* For each completed race (e.g., Grand Final), the spectator can expand to view the detailed ranking table including: Rank ("Hang"), Horse ("Ngựa đua"), Jockey, Score ("Diem"), and Notes ("Ghi chú").

Screen layout:

## Personal Profile

### Role: Spectator

- **Function trigger:** The spectator navigates to the "Ho so ca nhan" (Personal Profile) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to view and update their personal profile information.
    2. Display the spectator's prediction statistics, performance overview, and recent prediction history.
  - **Data processing:**
    1. **For updating profile information:**
      - \* The spectator can view and edit the following fields: Full Name ("Ho va Ten"), Email, Phone Number ("So dien thoai"), Avatar URL ("URL Anh dai dien"), Favorite Horse Breed ("Giong ngua yeu thich"), and Favorite Jockey ("Nai ngua yeu thich").
      - \* The spectator clicks the "Cap nhat thong tin" button.
      - \* The system validates the entered data and updates the profile details in the database.
    2. **For viewing statistics and history:**
      - \* The system retrieves and displays statistical insights ("Thong ke & Thanh tich") including: Current Rank ("Thu hang hien tai"), Total Predictions ("Tong so tran du doan"), Accuracy Rate ("Ty le chinh xac"), and Reward Points ("Diem thuong").
      - \* The system retrieves and lists the recent prediction history ("Lich su du doan gan day") with columns: Race Name ("Ten tran dua"), Selected Horse ("Ngua da chon"), Time ("Thoi gian"), Status ("Trang thai"), and Reward Points ("Diem thuong").

## Leaderboard

Role: Spectator

- **Function trigger:** The spectator navigates to the "Bang Xep Hang" (Leaderboard) menu.
- **Function description:**
  - **Purpose:**
    1. Allow the spectator to view the official competition rankings of horses and jockeys, filtered by tournament.
    2. Allow the spectator to view the top 10 spectators with the highest prediction accuracy scores.
  - **Data processing:**
    1. **For Horse & Jockey Leaderboard ("Ngua & Jockey" tab):**
      - \* The spectator can filter rankings by tournament ("Loc theo giai dau") including options: All ("Tat ca"), Summer Championship 2026, or Spring Derby 2026.
      - \* The system retrieves and displays the Horse Ranking table ("Xep hang Ngua dua") including columns: Rank ("Hang"), Horse Name ("Ten ngua"), and Accumulated Points ("Diem tích lũy").
      - \* The system retrieves and displays the Jockey Ranking table ("Xep hang Jockey") including columns: Rank ("Hang"), Jockey Name ("Ten jockey"), and Accumulated Points ("Diem tích lũy").
    2. **For Top Spectators Leaderboard ("Khan gia xuất sắc" tab):**
      - \* The system retrieves and displays the top 10 spectators with the highest prediction scores ("Top 10 Khan gia co diem du doan cao nhất").
      - \* The leaderboard table includes columns: Rank ("Hang"), Spectator Name ("Khan gia"), Favorite Horse Breed ("Giống ngựa yêu thích"), and Accumulated Points ("Diem tích lũy").
